

Inside Cartridge Portable Powder Extinguisher

HEBA provides a wide range of highly effective **INSIDE CARTRIDGE PORTABLE ABC DRY CHEMICAL POWDER EXTINGUISHERS**, suitable for most FIRE CLASSES.

The extinguisher body is constructed from **Cold Rolled Steel (CRS)**, which is then fabricated by **Automatic Metal Inert Gas (MIG)** welding process. Each extinguisher body is then subjected to **Hydrostatic Pressure** in order to assure the safety of the end-user. Then, the external surface of the body is **Shoot Blasted** and pretreated with zinc phosphate to improve corrosion resistance & paint adhesion.

To give a hard wearing as well as gloss finish, each extinguisher is **Electro-statically Painted**, using a **POLYESTER Resin**, before being baked in an oven.

The Dry Chemical Powder is capable to deal with class A fires involving carbonaceous materials like wood, paper etc. also deal with class B fires involving flammable gasses and liquids. Also can be applied for Electrical fires.

INSIDE CARTRIDGE
PORTABLE POWDER

Other Features of this Range of Extinguishers are:

- Supplied completely with hose and horn.
- Provided with carbon steel inside cartridge hydro-statically tested at 250 Bar.
- Supplied with durable textile fibers re-in forced fire hose.
- Provided with highly resistant fire hose to abrasion of extinguishing agent
- Supplied complete with wall mounted bracket.
- Controllable discharge that allows optimal use of the fire extinguishing agent.
- Suitable for type A, B, C and E fire classes.
- Easy to use, simple to maintain, and re-fillable.
- Supplied complete with safety valve.
